June 25, 2025

Dear Valued Customer,

Voltage Multipliers Inc. (VMI) acknowledges the importance and the impact of recent efforts for regulation of PFAS (per- and polyfluoroalkyl substances) materials. For this reason, VMI has conducted a company review of the presence of PFAS substances as of June 25, 2025.

From this review, VMI can confirm that VMI products and the raw materials used in the manufacturing of said products do not contain PFAS substances. With respect to items that facilitate the production of VMI products, VMI does make use of Teflon fixtures and dielectric testing fluid, which are suspected to contain PFAS materials. However, these production aids are used in such a way that do not incorporate PFAS onto VMI products.

To reiterate, VMI products do comply with PFAS regulations. In addition, VMI will continue to monitor local, US, and EU regulations concerning PFAS substances.

For additional information, please contact us via:
