Supplier Change Notification Letter

Dear Valued Customer,

We are writing this letter to inform you that VMI has qualified a backup supplier for a component that is used in all high voltage diodes. The component is a tungsten cylinder, referred to as a pin, which bonds to the silver leads and silicon die in the high voltage diode. The component form, fit, function, and material composition will remain the same.

Reasons for change:

- Original supplier has become unstable, unreliable, and unable to deliver product to VMI
 - Lead times have increased drastically
 - Delay of components to VMI have led to many late deliveries on our behalf to VMI customers
 - Component quality has led to scrapped product at VMI, increasing late deliveries

- Backup supplier has been in the tungsten industry for over 100 years
 - Provide similar components to hundreds of customers
 - Will hold reserve supply for VMI to reduce manufacturing interruptions
 - Material is available and ready for use at VMI

VMI plans to introduce the backup component supplier to our production line by June 15, 2023.

For additional information, please contact Jorge Mejia, Vice President of Diode Operations at Jmejia@VoltageMultipliers.com. We appreciate your ongoing partnership and look forward to continuing to supply you with the highest quality products and service to meet your current and future needs.
